STONY PLAIN SUN.

VOLUME NINE.

STONY PLAIN, ALBERTA THURSDAY, MAR. 21, 1929

Whole Number 450

The Lutheran Church and the Lord's Supper.

Lutherans teach that the body and blood of Christ are truly present in and with the bread and wine in the Sacrament of Holy Communion; are taken by all who eat and drink at the Lord's table; are received by the believing Christian for the strengthening of his faith and growth in godliness; and should be given to those only who have professed their Christian faith.

Matthew 26, 26-28: And as they were eating, Jesus took bread, and blessed it, and brake it, and gave it to the disciples, and said: "Take, eat, this is My body. And he took the cup and gave thanks, and gave it to them saying: Drink ye all of it, for this is my blood of the New Testament, which is shed for many for the remission of sins.

1st Cor. xiii, 10, 16: The cup of blessing which we bless, is it not the communion of the blood of Christ? The bread which we break is it not the

[The Editor does not hold himself responsible for opinions expressed in this column.]

Spruce Grove, Alta., March 11, 1929

The Editor,
Stony Plain Sun.

Dear Sir:

In the issue of your paper dated Feb. 7, there appeared an article entitled "Attend Lutheran Services" and signed "St. Matthew's Walther League." In this article there appeared a statement to which I wish to take exception: "Four hundred years ago the Christian church, after a long period of bondage, corruption and inaction, was restored to the new life of liberty, purity and fruitfulness. The act of God by which this revival was brought about is known in history as the Reformation. The instrument through which it was effected was the Word of God; the chief human agency was Martin Luther."

At the outset it may be remarked that the proofs for this strong statement are conspicuous by their absence. It is one thing to commemorate and misrepresent but it is another to make statements which received in the light of history are found to be solid facts.

All Catholics admit that grave abuses had crept into the church before the sixteenth century, but could not these abuses have been corrected by an ecclesiastical house cleaning without a definite rupture which has as a matter of fact convulsed all Christendom. Our Lord Himself said: "It must needs be that scandals come." There

LOCAL NEWS.

Mr J A Barrie is visiting friends at Vancouver at present, and expects to be back in Stony Plain April 15th.

John Miller, late of the U.S. Marines, is in Stony on a visit.

Dr Walton left on Tuesday for Busby, where his mother is seriously ill.

Mr Albert Wurtz was taken to an Edmonton hospital on Tuesday to undergo a major operation.

Henry Henkel left Tuesday with a carload of stock and effects, to settle on his farm in Castor district.

Mr Zerber is up from Holden this week, on a visit to his home here.

The case of J Armbruster v. M Soldan was up in the District Court last week for a hearing. After the evidence was all in, judgment was given in favor of the plaintiff Armbruster. Geo J Bryan for the plaintiff; H A Mackie, K C, for defendant.

Inga Councilors.

Inga Municipality's inaugural meeting took place last week, when Councillor R C Howat was elected Reeve. Mr Howat has filled the chair on a for occasion.

The new councillor on the board this year is Mr F J Francey. Mr E H Pidgeon retains his position as secretary with an increase in salary.

The Councilors are considering the matter of apportioning the amounts to be spent in each division on roads the coming season.

A grant of \$125 was given the representative of the Salvation Army, who was present.

The Councilors' meet next in Stony Plain on Friday, April 5th.

The Agricultural Society

About a score were present in the town hall on Saturday afternoon when Chairman W M Washburn called to order the meeting held for the purpose of reorganizing Stony Plain Agricultural Society.

A much larger attendance was expected, but owing to the poor roads, this was out of the question.

Several matters in connection with reorganization work were discussed, but action was deferred until a larger representation is present.

An effort will be made to hold a meeting in the same place on the afternoon of Saturday, March 30, when it is earnestly requested that all interested in Stony's annual Fair put in an appearance.

The Evil Of Grain Mixing

Following the unsatisfactory result of grading the 1928 wheat crop of Western Canada, a veritable deluge of protest and complaint has poured in to Dominion and Provincial Governments, Wheat Pools, Grain Commissions, Grain Exchange, and all farmer organizations. Merchants and business men generally, suffering because the farmers have suffered, add their protests. In all this volume of criticism perhaps no one feature has called forth more vigorous objection than has the practice of mixing.

It is quite true that everybody does not see eye to eye on this subject, and farmers themselves are sharply divided on the issue whether or not mixing should be absolutely prohibited and made an offence under the law. While many favor such a policy, others hold the opinion that if mixing was entirely disallowed there would be a terrible fall of low grade and no grade grain on the market, with resulting enormous loss to producers.

The Saskatchewan Grain Inquiry Commission has gathered within its own province a mass of evidence on this and allied subjects affecting the grading and marketing of Western grain, and proposes to carry its investigations further afield in Manitoba, Alberta, British Columbia, and Europe, in what is recognized as the most determined attempt yet made to find solutions to some of the acute problems confronting the Western grain grower. In due time the report and recommendations of that Commission will be laid before the legislative authorities.

There is, however, another form of mixing in regard to which there are no two opinions. It is unanimously denounced as an evil, and one that is costing the farmers of Western Canada many millions of dollars annually. Furthermore, control in the case of this particular form of mixing rests, not with Governments or Wheat Pools, or Grain Commissions, but with the individual grain grower.

The form of mixing to which reference is made is that indulged in by so many farmers of sowing seed of mixed varieties. Instead of sowing only pure seed of one good variety, the seed too frequently used is a mixture of different varieties, white wheats mixed with red wheats, with consequent loss in value of the crop harvested. Thus the original mixing takes place, not in country or terminal elevators, not on board ship, not in the world's markets, but right on the farms of Western Canada.

Investigation over a number of years has established the fact that certain varieties are best adapted to certain districts. This information is available to every farmer. It is his for the asking from his nearest Experimental Farm. He should secure this information and then sow the variety which grows best in his district. He may not be able to afford to purchase sufficient pure, registered seed of that particular variety to seed his entire acreage this year, but he should get a few bushels of such pure, registered seed, sow it in a prepared plot, and thus increase his seed supply on his own farm.

The frosts of last Fall make it necessary that all seed sown this spring be first tested for its germinating qualities. Strong germination is necessary in wheat, oats, barley and flax. Strong plants having healthy vigorous roots withstand adverse conditions such as spring frosts, insects, disease, better than weak plants. Farmers will be well advised, therefore, to send samples of their seed grain to their nearest Dominion Seed Laboratory and have it tested.

There is still another form of mixing on the farm which is even more disastrous, that is the mixing of weed seeds with the grain through the use of impure and not properly cleaned seed. Governments and railways combine to run special seed cleaning machinery demonstration trains through the country. Governmental seed cleaning plants. Nevertheless, tons of weed seeds are sown annually, as well as mixed varieties of grain, as was definitely proved by the seed drill survey conducted in Saskatchewan a couple of years ago.

Western Canada farmers must begin at the beginning in dealing with this mixing evil. First, it is essential that all seed sown be of one good variety, thoroughly cleaned, with all weed seeds eliminated, and tested to demonstrate its germinating qualities. With the groundwork thus laid for the production of clean, high grade grain, necessary further steps can and should be taken to preserve the identity, grade and standard of that grain all the way from the farm to the ultimate world market.

It sometimes happens that a man's usefulness ends when his salary is raised.

An elephant's bath requires 150 pounds of soap and more than 100 worth of the purest Indian oil.

Over \$40,000,000 worth of damage was done last year by fire in the British Isles.

The total acreage under pasture in Canada in 1928 was 9,528,043 acres.

Simple Precautions Against FLU

Sore Throat —

— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Kaiser Cost Germany Millions Every Year

Abdication Has Saved Country Large Sum In Salaries

It has been figured that Germany in the last 10 years has saved \$125,000,000 in salaries to the former royal rulers of the empire. Before the war the Kaiser cost Germany \$5,264,000 a year. Then came three kings—of Bavaria, Saxony and Wurttemberg—and seven grand dukes, who cost Germany more than \$5,000,000. Besides these royal "appointments" the other expenses of the imperial system brought the annual expenditures up to \$12,500,000. Of course there had to be big armies and generally increased cost of royal show under the royal government but this further cost could hardly be estimated.

PARENTS UNDERSTOOD THIS BABY'S LANGUAGE

"We thought we were going to lose our baby, teething," says Kentucky mother. "He couldn't digest anything and was getting thinner every day. After one of his fretful, crying nights, I thought of Castoria and got some. A few drops made him comfortable and after a few doses, he seemed like a different baby." Doctors everywhere recommend purely vegetable, harmless Fletcher's Castoria for colic, constipation, colic and other ills of babies and children, and millions of mothers know its gentle influence is best. Avoid imitations. The Fletcher signature is the mark of genuine Castoria.

Alberta Dairy Products

Exceeded In Value Twenty Million Dollars For 1928 Season

Alberta's dairy products for 1928 exceeded in value \$20,000,000, which represented 8.3 per cent. of total agricultural production. Dr. C. P. Marker, dairy commissioner, told delegates at the recent dairymen's convention in Edmonton. There was a marked improvement in the grade of cream supplied by producers and in the quality of creamery produced, he declared.

A DANGEROUS MONTH FOR THE BABY

Mothers Always Dread the Blustering March Days

No month of the year is so dangerous to the welfare of little ones as is March—the month of quickly changing weather. One day is fine, the next cold and blustery. One day dry, the next wet and disagreeable. In spite of all precautions the little ones will take colds and these colds often lead to more serious troubles. Mothers, when the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent the more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe—just like having a doctor in the house. The Tablets are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or a sour stomach.

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Dairying In Okanagan District

The North Okanagan District is turning increasingly to the dairy industry with profitable results. Cream cheques totalling \$260,000 were paid out during the past year.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermicide, they are tonic and health-giving in their effects.

By living on board private yachts moored on the River Thames, near Westminster, a number of Londoners escape paying rent, rates and house duty in return for a mooring fee of three guineas a year.

Education By Mail

R.C. Rural Correspondence Courses Cost \$13 a Pupil

Rural correspondence school courses in British Columbia, cost \$13 a pupil, while the ordinary public school student costs the province \$70, according to information tabled before the public accounts committee of the Legislature.

The committee was informed that 350 pupils in outlying parts of the province obtained their elementary school education by means of the correspondence classes.

Area Under Pasture

The total acreage under pasture in Canada in 1928, was 9,528,043 acres.

Reduce Aviation Expenditures

British Government Decides To Lessen Appropriation For This Year

British estimates for government aviation expenditures during 1929, presented to the House of Commons by Sir Samuel Hoare, air secretary, total \$81,000,000. This is a decrease of about \$250,000.

In connection with the estimates, Sir Samuel said the new airships, the R-100 and the R-101, should be completed early in the financial year.

"The two airships should begin the trials in the spring and I hope to see the flights to overseas bases, such as Montreal and Karachi, achieved during the year," Sir Samuel added.

NICE WORDS WON'T DYE a dress or coat...

Neither pretty pictures nor colorful adjectives will dye a dress or coat. It takes real dyes to do the work; dyes made from true anilines.

Next time you have dyeing to do, try Diamond Dyes. See how easy it is to use them. Then compare the results. Your dealer will refund your money if you don't agree they are better dyes.

You get none of that re-dyed look from Diamond Dyes; no streaking or spotting. Just fresh, crisp, bright new color. And watch the way they keep their brilliance through wear and washing. They are better dyes because they contain plenty of real anilines—from three to five times more than other dyes. But you pay no more for them than for ordinary dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or fast silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

ASK FOR A DEMONSTRATION.

G. Oppertshauser.

Continued from Page 1, Col. 2
have "always been scandals in the church. There are scandals at the present time. Did not Christ prophesy such a state of things in His parables of the tares and the wheat, and of the net filled with good and bad fishes? Was not one of His disciples the traitor Judas? Did not all of them deny Him?

Martin Luther is represented as an apostle of Reformation. He was a Catholic priest and monk who broke his vow and married a nun. At first he attacked not the doctrine of indulgences but certain abuses connected with them and wrote thus to Pope Leo X: "Most Holy Father, I cast myself at thy feet with all I have and am. Give life or take it; call, recall, approve, reprove; your voice is that of Christ, who presides and speaks in you."

We must not forget that politics played a large part in the origin of the so-called Reformation. The outbreak which followed the revolt of Luther was seized upon by avaricious German princes, as a pretext to plunder the monasteries and churches of their subjects, and gradually entire nations made the movement an excuse to ravage one another's territory in the hope of spoils. As the eminent Protestant writer, Lord Macaulay says: "The new theology spread with a rapidity never known before. All ranks, all varieties of characters joined the innovators. Sovereigns impatient to appropriate to themselves the prerogatives of the pope, nobles desirous to share the plunder of the abbey, good men scandalized by the corruptions in the church, bad men desirous

of the license inseparable from great moral revolutions, were men eager in pursuit of truth, weak men lured by the glitter of novelty—all were found on one side."

The article speaks of the Word of God as an instrument of reform. How can anyone prove that the Bible inspired without acknowledging the authority of the Catholic church which defined the canon of scripture, and declared what books are inspired and what are apocryphal.

Lastly may I quote the words of Luther to Melancthon which manifest his state of mind: "We must needs sin as long as we are in this world. . . sin cannot deprive us of God, even were we to commit in the same day a thousand adulteries and murders. . . I shall not deny that the new state of things frequently makes me tremble, particularly when my conscience reproaches me with having disturbed the ancient order of the church, which was so tranquil, so peaceful under the papacy, and with having, by my doctrine, created discord and trouble."

Other proofs might be given which would prove that Martin Luther was not an apostle of Reformation but a rebel against the church at whose altars he, for a time, faithfully served. But our article is already too extended, I conclude by observing that the members of the Waltham League might easily be better occupied in studying the facts of history rather than in publishing words of calumny against the apostolic and ancient church.

Thanking you I am,

Yours respectfully,
FATHER KEENAN.

A Friendly Note Of Warning

When a man occupying the important and high office of Lieutenant-Governor of a Province feels it incumbent on him to lift his voice in public protest against the selfish attitude of people in Eastern Canada regarding matters of vital concern to the prosperity and development of the Provinces of Western Canada, it is time for those same Eastern people and interests to awaken to the fact that they are playing a nationally dangerous game.

Lieutenant-Governor Brett, of Alberta, is not a man to speak hastily or without giving due consideration to the effect any statement from a man in his position may have. He is a highly trained professional man, absolutely impartial, strictly non-partisan in a political sense, and intensely loyal to Canadian ideals and institutions. Yet on the occasion of a recent visit to Ontario he was, to use his own words, "roaded to exasperation" over the attitude assumed by Eastern people towards the West and its needs and problems to such an extent that he made known his mind in a newspaper interview in the course of which he asked the very pertinent question: "If a barrier was placed at Fort William, what would happen to all the Eastern industries?"

Answering his own question, Dr. Brett declared they would be ruined. Yet Eastern interests go on blindly, and with a self-sufficiency amounting to smugness, declaring to the world and convincing themselves that they owe nothing to the West; that on the contrary, it is the East that has made and developed the West; and that his section of the Dominion is heavily in debt to them.

When a man in Dr. Brett's position even so much as hints in a published interview at the possible effects of cutting the Dominion in two at the head of the lakes, and follows that up by calling upon the people of the west to realize the absolute importance of "continuing to hammer away until they have a real voice in their own affairs," it is, we repeat, time for the East to give heed to the state of feeling they are themselves engendering in this Western country.

We do not believe there is more than a mere handful of people in Canada who would like to see the Dominion divided into two separate and distinct British commonwealths, east and west. At the same time there are unquestionably thousands who believe that economically Western Canada would be much better off, and decidedly more prosperous, if it was relieved from the handicaps imposed upon it through Eastern selfishness and self-interest.

The West demands the completion of the Hudson Bay railway. Every political party in Canada has approved its construction and pledged themselves to it. Yet the financial, transportation and commercial interests of Montreal, Toronto, Quebec and the Maritime Province seaports have been successful in denying this much needed outlet to the West.

The West stands badly in need of branch lines of railway without which tens of thousands of settlers are struggling to eke out an existence. These branch lines are likewise essential to the construction and development of our National railways, but Eastern interests opposed to Government ownership have been so far successful in blocking construction.

The East declares it cannot survive unless its manufacturing industries are bolstered up by high tariff protection imposed on the whole Dominion. The West has learned from bitter experience that it cannot develop and prosper under such a handicap. If the East insists upon and must have this artificial stimulus, let them have it, but give to the West, which can stand on its own feet and does not need artificial supports, freedom in regard to its own fiscal policies and needs.

The Western Provinces can only obtain "a real voice in their own affairs" by secession, by out-voting the East in the House of Commons, or by convincing the East as to the justice and necessity of admitting the West to a larger measure of authority in determining questions vitally and primarily affecting the West.

Secession should, and will be, seriously considered only as a last desperate remedy.

The ability to outvote the Eastern Provinces can only come with enormously increased population, which increase is being delayed because of the handicaps imposed on the West.

The sane, sensible, patriotic solution is for the East to abandon their present attitude of regarding the West, as one paper puts it, a child in need of a governess, and frankly admitting the right of Western people to determine voice in matters absolutely vital to their own welfare and progress.

That unity essential to Canada's all-round development and prosperity as a nation can never be realized unless the East abandons its present selfish and arrogant overlordship. It is the Eastern attitude that provides fuel for the spirit of bitterness which it would be idle to deny does exist in the West. If East and West are to grow together, the one aiding and assisting the other, there must be a radical change of attitude east of the Great Lakes.

There are 564,510,000 Christians in the world and twice that many non-Christians.

No reliable estimate of the comparative wealth of nations has been published since 1914.

CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops—
and Soothing Syrups — No Narcotics!

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and, by regulating the stomach and bowels, aids the assimilation of food; giving natural sleep without opiates. The genuine bears signature.

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is composed of purest ingredients, and is the only medicine for children that is so safe and so effective.

Dr. H. Fletcher.

A University at Sea

Six Weeks' Visit to the British Isles and Continent

In all respects the steamship *Metagama* will present a university at sea when she sails from Montreal on June 26, with more than 200 students from various Canadian universities, who are accepting the invitation of the Overseas Educational League to visit Europe this summer.

According to the itinerary, the party will disembark at Glasgow for a six weeks' visit to the British Isles and the continent. The British Empire Exhibition will be visited, as well as historic scenes of London and districts in Scotland, the Sir Walter Scott country, Stratford-on-Avon, Oxford, and the fourth and fifth weeks will be entirely taken up by London. The party will go to France during the last week, and will sail from Southampton on the Empress of Scotland on August 16 for Canada.

Discover Coal Seam

Excavations on the banks of the Little River for coal, within the limits of the city of Prince Albert, have struck a widening seam of harder quality coal. The engineer at the work, a man of practical mining experience, declares the merchantable coal is within measurable distance in the mine.

SPRING IMPURITIES DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This

Dr. Williams' Pink Pills are an all-year-round tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching, and every dose of these pills helps to enrich the blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills clear the skin because they go to the root of the trouble in the blood. In the spring autumn, rheumatism, indigestion, neuralgia and many other troubles are most persistent because of poor weak blood, and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people dose themselves with purgatives, but these only further weaken themselves. A purgative merely gallops through the system, emptying the bowels, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood which reaches every organ in the body, bringing new strength and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Sold by all medicine dealers or sent by mail at 50c a box by Dr. Williams' Medicine Co., Brockville, Ont.

Most cyclones in North America follow definite tracks which cross Southern Canada and Northern United States.

Makes Food Taste Better

No matter how good your fish or meat may be, whether a roast, a chop, a steak, poultry or game, Clark's Tomato Ketchup improves its taste. "Let the Clark Kitchens help you."

Prize For Grain Exhibit

As an added inducement for Canadian farmers to exhibit their products at the Chicago International Livestock Show this year, the Winnipeg Grain Exchange has donated \$500 to be sold at prices given by the Federal and Provincial Governments to the Canadian farmer who wins the grand championship in the grain section of the show.

Mirand's Liniment For Headache

W. N. U. 1559

WORLD HAPPENINGS BRIEFLY TOLD

Capital punishment has been abolished in Austria, Holland, Norway, Sweden, Portugal, Italy and Rumania. Announcement is made that His Majesty, with great regret, has approved the disbandment of King Edward's Horse.

Divorces exceeded marriages in Constantinople during the last year according to the Daily Mail correspondent. He gives the official figures as 5,289 against 7,951.

A combined total value of imports and exports of \$357,685,730 is the record of the port of Vancouver for 1923, according to a statement issued by the board of harbor commissioners.

Turkish police closed French and Italian schools in Constantinople. This action was taken owing to the failure of the school authorities to remove from the schools religious emblems.

Between eight and ten millions of dollars have been remitted to Canada through New York, in full adjustment of British Government debts to Canada hanging over from the war.

Police officers are given the right to arrest without a warrant of anyone carrying liquor, by an amendment to the Ontario Temperance Act, adopted by the legislature.

A passenger and mail air service between Victoria and Vancouver may soon materialize, if plans are found feasible. It will be the first service of its kind operated in Canada, it is said.

His Flesh Horribly Burnt

His druggist sold him a cheap Acid corn remedy, instead of giving him good old reliable Putnam's Corn Extractor which has been for fifty years the standard remover of corns and warts. "Putnam never fails. It is always a success. 25c everywhere. Refuse a substitute."

The Motor Car in Canada

The strides made by the automotive industry during the last decade have been remarkable. The motor car is now regarded as a luxury. It has attained its rightful place as a utility. The first auto was sold in Canada in 1869. Today the total registration runs close to 556,000. Official statistics show that 936,929 autos entered Canada during 1922 for touring purposes, representing a traffic value of \$170,000,000. Thus the auto took fourth place as a revenue producer.—From the Saskatchewan Star.

A foe to Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the inmost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

The only gold coin in general use in Egypt and the Sudan is the British sovereign.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

It is written in records of the Civil War that a code message sent by General Grant to Washington has never been deciphered.

"I Suffered Terribly With Sore, Aching Back"

Mrs. Roland Ferguson, 194 Lake St., Peterboro, Ont., writes:

"For over two years I suffered terribly with sore back. I was almost mad with the pain, and had doctor after doctor, but I was discouraged. Then my father, who is a firm believer in Dr. Chase's Kidney-Liver Pills. I followed his advice, and am glad to say I was completely relieved of that torturing pain in my back. It is over a year since I used these pills, and I have had no return of the trouble, but always keep them in the house."

Dr. Chase's Kidney-Liver Pills

Paris Doing Away With Street Sweepers

Modern Machinery Taking Place of Women Workers

The old woman who shivering sweep the narrow streets of Paris have lost their fight against modern machinery. The city has decided their usefulness is ended. Henceforth only one vacancy in three will be filled, and before long these jobs will be abolished as their holders die or leave.

These women were among the picturesque sights of Paris, swinging their long-handled, brushwood brooms, beginning at dawn. But now with few remaining there is more of pity than of romance in the sight.

It won't be long before the good old woman will be photographed leaning on her witch-like broom and written about for the newspapers as the last of the sweepers.

Painful Sprains, Bruises

Restored By Nerviline

There is something power in Nerviline that has made it famous for nearly fifty years past. It sinks in deeply, it penetrates quickly, it takes away the pain from a sprain and brings grateful relief to bruised, aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago; if Neuralgia bothers you now and again, use trusty old "Nerviline." It works wonders, whether the pain is internal or external. Get a large 35 cent bottle from your dealer to-day.

Says Horse Will Go

Professor Furlong of the University of California, says that in another century the horse will be extinct on our continent. He is so sure about this that he is now collecting skeleton specimens of horses for the California Museum.

With so thorough a preparation at hand as Miller's Worm Powders the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child infected to this attack of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

Immigrants For West

Six ocean ships with a total of 2,109 immigrants for Western Canada docked at Halifax recently. These new settlers travelled to Winnipeg over Canadian National lines for distribution throughout the west.

Largest Single Item In The Dominion's National Wealth Is That Of Agriculture

The aggregate national wealth of Canada for the year 1926, was \$28,691,482,000, says a report issued by the Dominion Bureau of Statistics. This figure is exclusive of undeveloped natural resources. Similar estimates placed the total wealth for 1925, at \$25,873,171,000, and for 1924, at \$22,160,000,000, "though these figures are not exactly comparable in view of certain improvements and additions made in the method of estimation," the report points out. The figures, however, can be taken to indicate an increase of about \$500,000,000 for the twelve months under review over the previous like period, and approaching an advance of \$3,000,000,000 in the five years 1921-26, the report continues.

The largest single item in the Dominion's national wealth for 1926, was that for agriculture, which reached a total of \$7,817,715,000, or 28.28 per cent. of the entire amount. This figure includes the value of agricultural production for the year. The second largest element was urban real property, which reached a figure of \$7,081,375,000; the tangible value of the forests was \$1,866,613,000.

As regards the provincial distribution of wealth, Ontario ranked first, with estimated aggregate wealth of \$9,130,189,000, or 34.2 per cent. of the total, and Quebec second, with estimated wealth of \$6,656,108,000. The western provinces came first in per capita wealth, however: British Columbia held first rank with a per capita wealth of \$3,844; Alberta second, with \$3,608; Saskatchewan, third, with \$3,559; and Manitoba fourth, with \$2,557. These figures may be compared with \$2,802 and \$2,598, the per capita wealth of Ontario and Quebec, respectively, and \$2,842, the per capita wealth for the whole Dominion.

By provinces, the estimated wealth was:

Prince Edward Island,	\$145,745,000;
Nova Scotia,	\$835,748,000;
New Brunswick,	\$723,592,000;
Quebec,	\$6,656,108,000;
Ontario,	\$9,130,189,000;
Manitoba,	\$1,889,608,000;
Saskatchewan,	\$2,920,739,000;
Alberta,	\$2,192,067,000;
British Columbia,	\$2,185,210,000;
Yukon,	\$12,478,000.

Rush For Homesteads

Hundreds Of Homesteads Taken Up In Three Prairie Provinces This Year

From the point of view of new homesteads taken up, the year 1929 has got off to a good start January saw 761 homesteads died upon, as compared with 457 for the same month last year—an increase, roughly, of two-thirds in favor of the present year. Alberta led the list with 286, as compared with 201 for January, 1928; Saskatchewan followed with 309 as against 194; Manitoba came next with 42 against 51, and British Columbia last with 24 against 11.

Products produced from the forests of Canada have an annual value of about \$475,000,000, of which approximately \$450,000,000 is distributed for labour, equipment and supplies.

Teacher: "Can any of you tell me an old saying that is now out of date?"
Moses: "Yes, sir: 'Honesty is the best policy.'"—Humorist's Listy, Prague.

W. N. U. 1777

Maintenance Of Roads

Much Time and Attention Devoted To Protection Of Roadways Well-constructed highways are necessary in Canada to meet the insistent demands of traffic, but well-maintained roads are even of more importance in the interest of economy. Consequently, provincial road administrative organs and engineers are devoting a great deal of thought, and attention to the care and protection of roads. In 1927 the mileage of roads under maintenance in Canada under the patrol or gang system was 44,416 miles, at a cost of \$16,024,617.

Birds have the most remarkable memories of all wild life.

FASHION

No. 841—Simulates Two-Piece Mode. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting.

No. 334—The Smart Bolero. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 40-inch material with 3/4 yard of 36-inch black material for bolero and skirt, and 1/2 yard of 40-inch material for waist and collar.

No. 941—Chic and Slender. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3 yards of 40-inch material with 1/2 yard of 27-inch contrasting.

No. 337—Perfect Foundation. This style is designed in sizes 16 years,

36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 2 1/2 yards of 36-inch material.

No. 912—For Classroom. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting.

Each No. 11053—Six Conventional Motifs. Pattern contains two each of 3 designs, 6 inches wide by 9 inches high (blue).

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

All patterns 25 cents in stamps or coin (cash preferred). Wrap coin carefully.

In Need Of Publicity

New York Paper Has Queer Idea About Vancouver

Vancouver, which is voting some \$80,000 this year for publicity purposes, might spend a few dollars of it New York to let New York know there is such a place. A New York paper, in alluding to Percy Williams' feat, says: "The young Canadian is a sensation, and well he might be, as he stepped from the backwoods of Northwest Canada into fame with a dual victory at the 1928 Olympic games." Evidently Vancouver has still a lot to learn about putting herself on the map.—Victoria Colonist.

Opinion Has Changed

The change that has taken place in the mental attitude of the people of Canada toward its vast northwestern areas is simply amazing. At the present time it is admitted on every hand that this territory is no longer a barren wilderness, but a region packed with immeasurable potential wealth, which only awaits enterprise and capital for its development.

Make Soil Surveys For Establishment Of Agriculture On a More Scientific Basis

Fruits Of British Columbia

Almost Every Variety Of Fruits Now Grown On Pacific Slope

Most fruits except those indigenous to the tropics or sub-tropics, are now being produced in British Columbia. Apples, apricots, cherries, peaches, plums, prunes, nectarines, figs, loganberries, raspberries, strawberries, grapes, almonds and other less hardy fruits and nuts are now grown commercially. The principal crop is apples, the production of which has increased in the last 17 years from 220,000 bushels to over 3,000,000 bushels.

Recent experiments have shown that some districts of British Columbia are likely to become notable as producers of fruits, nuts and crops that have hitherto not been grown in the province. Flowering bulbs are now being grown profitably.

Co-operative marketing is largely practiced by fruit growers and farmers generally. A large percentage of the fruit produced in British Columbia is exported to distant markets, including Great Britain, the Orient and Australia. A horticultural branch is maintained by the Provincial Government to assist the industry.

Mistreating The Heart

Few People Pay Attention To Warning Of Trouble

Take care of your heart. You have only one. You give it a huge amount of work to do and it does it without telling you how you are mistreating it. But when it does rebel and tells you, pay attention to the warnings.

These are some of the evidences of a worn-out heart: You are short of breath on exertion that had not previously produced distress. You may notice that your shoes are tight in the evenings, but that you have no difficulty in putting them on the next morning. Then one day you take cold the next day you are short of breath, you have a distressed cough and your feet are swollen.

As soon as the symptoms are relieved the average person wants to get up rather than to go about slowly and gradually getting back to his usual activity. It would not be unmitigated bad fortune for a person with a bad heart to have a broken leg too.

Object Had Vanished

The class had been told to bring things to school for drawing lesson, and just as the lesson was about to begin, a small boy was found standing tearfully at his teacher's desk.

"I've swallowed my object," he explained.

"What was it?" asked the teacher anxiously.

"A banana," replied the would-be artist.

As much as \$20,000 may be spent on the organs installed in the best movie houses.

Indian Wedding

The ancient marriage rites of the Stoney People were exemplified when Chief Bear Paw and his minor chiefs united Miss Sylvia Hamilton-Cole, of Hilverum, Holland, to Mr. Louis Lantz, of Vancouver. Immediately after the picturesque Indian ceremony which took place on the Bow River at Banff, the couple were again married according to the rites of their own church. Bear Paw is seen placing the eagle feathers, emblem of faithfulness, on the groom's head and bracelet on the wrist of the bride.

In view of the widespread interest that is being taken in the procuring of settlers for the farm lands of Canada and in the establishing of agriculture on a more scientific basis,

W. A. Johnston, of the Geological Survey, presents some interesting facts about soil surveys. He states that soil surveys have been carried on to some extent during the past few years by the provincial governments in the prairie provinces, that land classification work has been done by the Department of the Interior, and that the mapping of soils which is primarily a geological problem, has been conducted by the Geological Survey.

A soil survey of any area shows the character and location of the several types of soil in the area and thus provides information regarding soil conditions that is of value not only to the farmer but to the scientific agriculturist outside the area who is called upon to give advice regarding questions of the soil improvement or who is attempting to solve problems regarding the most effective uses of certain kinds of soil. The fundamental principles of a soil survey is that each type of soil is best adapted to certain kinds of crops and requires the same kinds of farming practices and methods of soil improvement. It is held by scientific agriculturists that the art of agriculture, the oldest and most fundamental of all the sciences, is the least developed, and it is well recognized that there are at least a few distinct types of soil in each of the physiographic provinces that require different methods of cropping and farm practice. A soil survey in many cases reveals important problems of soil improvement and farm practice that need attention.

The perennial question of how long exclusive grain growing can be carried on in prairie provinces is partly a question of the character of the soil, for some soils can be cropped continuously much longer than can other soils. Again, the question of soil drifting, which has become a serious problem in many parts of the prairie provinces, is partly a question of the character of the soil, for some soils drift badly whereas others do not. A soil survey also affords a guide in the buying and selling of farm property, and in the selection of land for particular purposes.

Soils may be classified in several different ways, depending upon the point of view of the investigator. A purely geological classification, that is, according to the physical character and mode of origin of the soil, may be inadequate from the point of view of the scientific agriculturist, but must be taken into consideration in any scheme of classification. The geological classification ordinarily distinguishes ten to twelve different types of soil in a single physiographic area. The number may be increased if necessary, but there appears to be no need at present for any elaborate classification. The soils in Canada as geologically mapped usually include swamp deposits, dune sands, alluvium of streams, lake or marine sand, silt and clay, and glacial drift in its various forms such as moraines of the ice-sheets, kames or gravel hills and outwash sand plains.

The Geological Survey has mapped and described the soils from the point of view of origin and physical character in several areas in Canada, in the vicinity of Ottawa, in the Rainy River District, Ontario, in southeastern Manitoba, and in the Winnipegosis District of Manitoba. The three latter areas were mapped especially for the purpose of supplying information to intending settlers. Recently the mapping has been extended to cover the greater part of southern Manitoba up to latitude 52 degrees, and it is proposed to issue a map covering this area.

U.S. Destroyers To Visit M.C.

The United States Government proposes to send six destroyers to visit British Columbia ports during the summer of 1929. Three of these vessels will be at Victoria, and three at Vancouver, from July 11 to July 15. Announcement to this effect was made by Hon. J. L. Haulton, minister of national defence.

WORLD HAPPENINGS BRIEFLY TOLD

A survey of Fort Churchill will be undertaken immediately by the provincial government for the purpose of laying out a model townsite at Manitoba's seaport.

Charles Angers, former member of parliament, is dead at Quebec, the age of 71 years. He represented Charlevoix County, at Ottawa, in 1896. He was a Liberal.

Regina's assessment for 1929 will be two and a half million dollars greater than the amount upon which 1928 taxes were struck, it was estimated by R. J. Westgate, city assessor.

The Polish newspaper Rzeczpospolita says it has learned Pope Pius will begin a tour early in 1930, visiting Trieste, Zagreb, Budapest, Caracow, Warsaw, Vienna, Munich, Brussels, Dublin, Paris, Madrid and Lisbon.

Bankruptcy proceedings have been instituted against Princess Victoria, sister of the former Kaiser. The Princess, who is living in seclusion at the palace in Bonn, Germany, declined to make a statement. The first meeting of her creditors was called for April 4.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradiate except through a severe operation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Not only can you astonish your friends with the French you learn in 10 Easy Lessons: You can astonish a Frenchman.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will ally the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Pupils in Scotland have to get through about three times as many books in the school year as London school children.

Use Minard's Liniment for the Flu. Flashes of manufactured lightning 20 feet long have been produced at the Pittsfield (Mass.) laboratory of the General Electric Company.

BILIOUSNESS RELIEVED QUICKLY

CARTER'S Little Family Vegetable Pill quickly starts the bile flowing, gently moves the bowels, the poisons pass away, the sour and acid stomach settles, and biliousness vanishes. Sick Headache, Indigestion, Bad Breath and Constipation improve by the gentle action of these tiny vegetable laxative pills. All Druggists 25c and 75c red pills.

CARTER'S LITTLE PINK PILLS

Electric Power In Alberta Transmission Lines Spreading Over Province At A Rapid Rate

The rapid rate at which electric transmission lines have been spread over the province of Alberta, especially during 1928, is indicated in a recently issued government report. A network of high tension lines now radiates east and west, north and south over the central and southern part of the province. There is a continuous line from Edmonton in the north to Magrath south of Lethbridge, in the south, with the exception of the gap of less than thirty miles between Millet and Ponoka still to be closed.

One power company, with headquarters in Calgary, is operating 332 miles of 66,000-volt lines and 839 miles of 13,200-volt lines. Of this mileage approximately 50 miles of 66,000-volt lines, and 474 miles of 13,200-volt lines were built during 1928, and the company's territory in the north now extends as far east as Wainwright and Hardisty.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from cutting corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. It is a device with corn callouses or sore foot lumps, use "PUTNAM'S" it's reliable, and sure to shroud up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Sugar Beets a Paying Crop Sugar beets proved the best-paying crop in the Taber-Barnwell Irrigation district last year, returning an average of \$69.59 per acre. Alfalfa came second, with \$25.85 per acre, and wheat third, with \$23.27. The average production per acre in the project was worth \$28.97.

SPARKLING EYES AND ROSY CHEEKS

The Birthright Of Every Girl With Rich, Red Blood In Her Veins

The dull eyes that ooze with bloodlessness is a sure sign of misery and weakness. Anaemia—that is bloodless—girls and women have dull, heavy eyes with dark lines under the eyes. But this is not all. Anaemia works havoc all through the system; girls grow painfully weak and irritable; they are breathless and incapable of much exertion, while older women who are anaemic complain of being "never really well."

There is only way to bring brighter, better health to pale, pinning girls and women. That way is to invigorate the body with new blood—healthy blood that imparts strength and restores the bright eyes and rosy lips of perfect health.

Dr. Dr. Williams' Pink Pills make new rich blood and bring health and strength has been proved in thousands of cases. One such case is that of Miss Margaret White, Parry Sound, Ont., who says:—"I was attending high school and examinations were coming on. I was working hard, and began to feel easily tired, and often had severe headaches. When I sat down to a meal I felt that I did not want to eat. I went to a doctor who told me that I was anaemic. I took his medicine, but made little progress. Then my aunt, who had great faith in Dr. Williams' Pink Pills, got me a supply and I began taking them. I soon noticed that my appetite was improving, and the headaches came less frequently and that I was not so easily tired. I went away to camp for my holidays, taking the pills with me and taking them regularly. The result was that I returned home a healthy girl, my weight increased, my cheeks grew rosy and every ache and pain had vanished. I strongly recommend every young girl to give Dr. Williams' Pink Pills a fair trial."

If your dealer does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Tested Rocket Sled A "rocket sled" was tried out at the Schleisheim aviation grounds by Max Valler, inventor of several rocketed vehicles. The sled weighs 240 pounds and can be equipped with eight rockets. Valler, using only two rockets, made fine speed on level ground. Spectators tried to visualize the speed that could be made down a snowy slope under the impetus of the rockets, but gave up the attempt before reaching definite conclusions.

Minard's Liniment for Coughs and Colds.

Acts Like A Flash In Relieving Colds

That's why so many people buy BUCKLEY'S. It's the only cold remedy that's guaranteed. You'll find its unique power in the 40 doses in a 75-cent bottle! Ask your druggist for "Buckley's".

SUNDAY SCHOOL LESSON MARCH 24

STEWARDSHIP AND MISSIONS

Golden Text: "It is required in stewards, that a man be faithful."—Corinthians 4:2.

Lesson: Genesis 12:1-3; Deuteronomy 8:17, 18; Jonah 3:1-10; Malachi 1:7-12; Matthew 28:18-20; Acts 1:6-8; 13:1-3; 26:12-20; Romans 1:14-16; 1 Corinthians 16:2; 2 Corinthians 8:1-15; 9:1-15.

Devotional Reading: Psalm 91-8.

Explanations and Comments

Stewardship In Regard To Missions. Acts 1:6-8.—The apostles met Jesus on the Mount of Olives, and there they asked Him if at that time He would restore the Kingdom to Israel. Their question shows how well-nigh impossible it still was for the apostles to rid themselves of the common Messianic expectation of the Jews, that the Christ would rule over a Jewish nation, independent of Rome and herself dominant, politically and religiously, over the other nations of the earth. He answered them with a partial outpouring of the Holy Spirit to teach the apostles that Christ's Kingdom is not of this world.

"It is not for you to know the times or seasons, which the Father hath set within His own authority," was the answer of Jesus. "It implies that He will restore the Kingdom to Israel; not, however, to Israel after the flesh, as the apostles imagined but to the Israel of God, i.e. to Christian believers of every nation, by making Christianity the dominant religion."

"O God, I pray Thee for the childlike heart. That can enjoy—all vexing things apart."

The Beatles Thru in heaven and earth do show. Nor fret myself with things I do not know."—Babcock.

And then Jesus promised power through the coming of the Holy Spirit, and gave His great commission: they were to be His witnesses both in Jerusalem and in all Judaea and Samaria, and unto the uttermost part of the earth. Some have called these four missionary ones parsons, missions, state missions, home missions, and foreign missions. The Acts records the story of how the apostles carried out the commission.

"The uttermost part of the earth" is represented as the capital of the Empire, the place where, as Irenaeus said, "All met from every quarter."

This message always hurts me when I think of the vast tracts of earth that have never heard the name of Christ."—G. Campbell Morgan.

Rub It In For Lame Back.—Brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

A cast off railroad locomotive with its wheels removed, heats a Norwich, Connecticut passenger station. It performs efficiently, supplying heat to the train shed, station and cars in the yard as required.

Hard and soft corners both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

An armored vest and a breast machine gun, which starts shooting when the wearer raises his hands as the command "hands up," is a new creation for bank guards and night watchmen.

CRUMBLY TEETH

Help your children to have sturdy bodies, sound bones and strong teeth. Give them

Scott's Emulsion rich in vitamins. It serves the needs of childhood equally as well as it does grown people.

Scott & Bowne, Toronto, Ont. 52-60

A Great Canadian

Prof. Shotwell Was Close Adviser Of Woodrow-Wilson and One Of The Authors Of Kellogg Peace Pact

Mr. E. J. Garland and the Prime Minister deserve thanks for disclosing to Parliament recently that one of the real authors of the Kellogg Peace Pact is none other than a Canadian, Prof. Shotwell, of Columbia University. Canada has given many notable figures to the industrial, commercial and academic life of the United States. It is doubtful whether she has given anyone who has made a more distinguished contribution to the republic than Prof. Shotwell. Born in Canada and educated in Canada, Prof. Shotwell stands today as one of the most eminent figures in the whole scholastic field of the United States. His name, indeed, is known wherever international or world politics is discussed; the pity is that it is not better known among his own countrymen here in Canada.

Prof. Shotwell first arrested world attention when he became one of the close advisers of Woodrow Wilson in the sphere of foreign affairs. When the Peace Treaty of Versailles was in the making, he was in Paris; and later on, in pamphlets and numerous volumes and newspaper articles and lectures he has dealt with international questions with a scholarship and sure grasp of realities rivaled by few of his contemporaries.

Prof. Shotwell, in fact, must be ranked among the greatest of living Canadians. The pity is that, like many another, he is an exile from the land his talents could serve so well.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear have the children make a noise it would bother me so."

"A friend advised me to take

MILBURN'S HEART NERVE PILLS

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks and now I am feeling fine again."

Price 50c a box all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Western Progress

The thriving city of Regina established a notable record in 1928, as an industrial city, by producing the last past year 12 important industrial concerns located in Regina. They are said to have expended about \$5,000,000 in sites, buildings and equipment, and they will employ well up to 2,000 men. Housing accommodation was built last year for 1,000 families, and building has not yet caught up to the demand.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Extirminator to drive out the parasites.

Change Bread To Cake

Here's the Magic Recipe

Cut slices of day-old white bread 1/2 inch thick. Trim off crusts. Cut each slice into strips 1/2 inch wide by 2 inches long.

Spread these strips on all sides with Eagle Brand Sweetened Condensed Milk, covering bread well. Roll strips in dry shredded cocoanut, broken very fine. Place in pan and brown very delicately on all sides under low gas flame, or toast on a fork over coals.

Delicious little cocoanut cakes result—made from bread. Taste just like Angel Food cakes. Try them! This and dozens of other magic recipes are found in the Eagle Brand Cook Book "New Magic in the Kitchen." Write for your free copy to The Borden Co., Dept. BW, 140 St. Paul St., W. Montreal, mentioning this paper.

Take Daylight From Air

Reproduction Of Light Said To Be Next Wonder

A radio aerial draws radio waves out of the air. Radio treats essentially with sound. Absorption and reproduction of light, by a method strikingly similar to radio is likely to be next. R. T. Gee, London, Ont., inventor, president of the R. T. Gee Company, Limited, manufacturer of electric light bulbs, is the discoverer. The process, he states, is to be soon available for general use. When it is introduced, it is stated in scientific circles, it will revolutionize illumination, which is today chiefly created by electricity. For, in addition to drawing energy out of the air and reproducing it, Mr. Gee's method provides for the storage of such energy until it is needed. This means, it is explained, that aerials at work in the daytime will not only absorb but also store sunlight for reproduction at night.

HOUSE PASSES BILL FOR C.P.R. BRANCH LINES

Ottawa.—The Canadian Pacific Railway bill for branch line extensions completed its passage in the House of Commons, when it was given third reading. The bill emerges intact, with the exception that the proposed Sutherland-to-Melfort line in Saskatchewan was eliminated in the commons committee. The bill now goes to the senate.

The measures authorizing the Canadian National branch line developments still stand for third reading on the order paper in the commons. The bills have been held up on account of the budget debate, but will likely soon be accepted and also passed on to the senate.

The C.P.R. bill, being a private one, came up during the hour in the house set aside for private members' bills. It passed with little or no discussion.

The house also quickly gave third reading to the bill which will incorporate Barclay's Bank (Canada) without amendment.

Radiogram Received From the Antarctic

Welsh Society of Saskatoon Gets Message From Scientist With Byrd Expedition

Saskatoon.—A radiogram from the Antarctic, relayed by mail by the New York Times, has been received by Thomas Phillips, Saskatoon, from Frank Davies, in which the latter wishes the Saskatoon Welsh Society a joyous reunion for 1929.

Mr. Davies, at one time an instructor on the University staff here, and now a scientist with Commander Richard E. Byrd, in his expedition to the South Pole, sent the message on February 28 from "Little America," Antarctica, and it was received in New York on March 2, too late for the local celebration, which took place March 1. The document will nevertheless form a valuable item in the archives of the Welsh Society in Saskatoon.

Telephone Service Increased

Hundred Line Extension Has Been Completed

The Pas, Man.—It was announced by H. Coddington, commercial superintendent of the Manitoba Telephone system, that arrangements for an other hundred line extension on the switchboard in The Pas exchange are complete.

"When we took the plant over last July, we had 237 subscribers," said Mr. Coddington. "Today we have 395, and it looks as if we will go over the 400 mark within the next two months."

"We intend to extend the long distance facilities north to Flin Flon during the present season and we have set aside \$19,000 for this work."

Mr. Coddington said that the long distance business originating in The Pas was far beyond expectations.

Pilot Has Freak Accident

British Airman Had Propeller Shattered in Encounter With Hawk

Chico, Calif.—Victim of a freak airplane accident, Flying Cadet R. G. Hamilton, R.F.C., was forced down in a ploughed field near Cana, six miles north of here, with the propeller of his pursuit plane shattered, the result of an aerial encounter with a hawk.

Cadet Hamilton, attached to the British airplane carrier, H.M.S. Hermes, now at San Diego, was flying from that city to Vancouver, B.C., when the freak accident occurred.

Prove King Is Recovering

London, England.—The papers are giving great prominence to the first photographs of King George taken since his arrival at Craigview House. They show His Majesty seated in a bath chair in the grounds with Queen Mary standing beside him. The photographs lend confirmation to recent reports of the King's favorable progress toward recovery.

W. N. U. 1777

Wants Canada To Develop Helium Gas

Operation of British Dirigible Would Necessitate Obtaining Gas Here

London, England.—Development of helium gas for use in airships in Canada is a possible development of the building of the giant dirigibles for trans-oceanic transport by the British air ministry, Sir Samuel Hoare, air secretary, intimated in the House of Commons. He said it was hoped to approach the Canadian government later to see whether it would be possible to produce helium in Canada as the gas is produced and used extensively in the United States.

The two airships, he hoped, would be ready to take the air by spring or early summer.

If the home tests are successful it is proposed to make a flight to Egypt and India, and then to Montreal.

Toronto.—Large quantities of helium gas can be produced from the gas wells of the Bow River Valley, of Alberta, to the south of Medicine Hat. The production of helium in commercial quantities was first accomplished in Canada during the war as a result of researches made by Prof. J. C. McLennan, of the University of Toronto.

Helium is non-inflammable and though less buoyant than hydrogen, is much safer.

Fire Sweeps London Factories

Heavy Loss in District Occupied By Paper Houses

London, England.—The biggest fire that London has experienced in a long time caused heavy damage on the south shore of the Thames in a district occupied by paper and tin factories. Three hours after the first alarm, flames were shooting 100 feet into the air, a whole series of the factories being ablaze.

A large part of London was illuminated by the blaze. Scores of fire engines and hundreds of firemen were trying to prevent further spread of the conflagration. They managed to avert danger from neighboring workmen's homes, although the families fled.

One of the losses in the fire was 400 tons of newspaper paper.

Heavy Snow in Colorado

Two-Day Storm Isolated Small Towns Near Denver

Denver, Colo.—Small towns and villages in the Rocky Mountain region were marooned by snow that covered highways to a depth of three feet in places, following a two-day storm.

The storm area extended northward to the Canadian border, spreading a white blanket over Montana, Colorado and Wyoming.

A group of high school boys rescued Frank Nelson, 74, from his cabin near Mount Almagre, fifteen miles from the famous Cripple Creek mining district of Colorado, where he had been marooned without food.

The Disarmament Question

Britain and U.S. Must Agree in Matter Says Balfour

Buffalo.—The question of Anglo-American relations overshadowed all other political topics in the interest of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We feel, in England," he said, "that unless our two countries can work in agreement, the cause of disarmament is lost. We will lose the respect of essential powers and another war is on the way."

Was Hero Of Gallipoli

London, England.—General Sir Charles Newsham, who at an advanced age, served in the Gallipoli and Saloniki defence and mentioned in despatches, is dead at the age of 64 years. He retired in 1924.

Noble's Resignation Accepted

London, England.—The Exchange Telegraph Company said it had been advised by telegraph at Rome that General Umberto Noble, commander of the ill-fated Italia expedition, had resigned his rank and office. The resignation was accepted.

SHOWS RECORD SURPLUS

Hon. James A. Robb, minister of finance, who introduced the budget in the House of Commons, on March 1, in which he trimmed down taxes, reduced debt and revealed a record surplus of \$69,782,000.

Expect To Complete Railway in April

Line To Churchill Being Steadily Pushed Onward

Winnipeg.—Within eight of the sea, steel laying workers are pushing steadily onward to Fort Churchill, terminus of the Hudson Bay Railway, and early in April, unless the unforeseen occurs, will have completed their work.

Telegraph communication with Churchill was established for the first time on March 12, and steel is now within 12 miles of the port, stated H. A. Dixon, regional chief engineer of the Canadian National Railway, here, construction material for work at the port already is en route north.

Many Applications For Assisted Passage

Approval Given Large Percentage Of Prospective Settlers

London, England.—In the thirteen months ending January 31, 1929, 6,583 families and 28,468 individuals not included in families applied for assisted passage to Canada, Right Hon. L. C. M. Amery, secretary of state for the Dominions, told the House of Commons. Of these, 2,772 families, and 15,718 individuals had been approved and 2,140 families, and 15,381 individuals had sailed for Canada. These figures did not include the special scheme under which the party of British miners went to Canada as harvesters.

Left Large Estate

Toronto.—William Kellaher, ex-chamberlain of Toronto, who died recently at the age of 83 years, left an estate valued at approximately \$200,000. Mr. Kellaher, who arrived in Toronto penniless more than 40 years ago, willed \$150,000 to local orphanages.

"THE TEN-FOUND SMILE"

A happy group of Britishers who have just arrived in Canada under the new ten-pound fare. Asked for comments as to the possible movement under this reduced rate, officials of the Department of Colonization and Development, Canadian Pacific Railway, say: "While we are hopeful, of course, that, consistent with the needs of the Dominion, many will take advantage of the opportunity afforded by the new rate, it is far too soon to state that much may be expected. Indeed there are indications that, apart from the first stimulus arising from the novelty of a new rate, the majority taking advantage of it are not looking for agricultural opportunities, and cannot therefore be readily placed through existing colonization organizations. The movement as a whole, therefore, may prove to be disappointing."

Auto Driver Killed Trying For Record

Machine Out Of Control Crashed Into Sand Dunes

Ocean Speedway, Daytona Beach, Fla.—Lee Bible, 42-year-old Daytona Beach garage mechanic, rode to a spectacular death in the 36-cylinder racing car with which he was vainly attempting to break the world's speed record of 231 miles an hour, made by Major H. O. D. Seagrave, of England. Speeding at more than three miles a minute, the machine got beyond his control and crashed into the sand dunes, striking and killing also Charles Traut, a news reel cameraman. Bible left a wife and two children.

The accident, one of the most tragic in the history of beach racing here, occurred just after Bible crossed the measured mile course at a speed of 202 miles an hour, and was witnessed by a crowd of approximately 20,000 spectators who lined the sand dunes for miles.

To Fight "Red" Menace

Manitoba Command Canadian Legion Asks Action Against Communists

Winnipeg.—Eradication of Communism from Canada and the prosecution of those responsible for its spread, was demanded in a resolution unanimously adopted at the fourth annual convention of the Manitoba command, Canadian Legion, British Empire Service League. The convention also urged that the Communists be prohibited from holding meetings in public schools.

Communists, the delegates declared, were attempting to instill their doctrines into the minds of children and the newly-arrived immigrant. Communist ideals were being circulated in literature and songs "grossly blasphemous, seditious and contrary to the teachings of Christianity."

They would "demoralize youths and would lead to ultimate bloodshed, revolution and the breaking down of all religious and civil authority."

Want Police Force Similar To Mounties

Idea Suggested To President Hoover To Stop Smuggling

Washington.—A federal constabulary, similar to the famous Royal Canadian Mounted Police, has been suggested to President Hoover as a means of ending liquor smuggling across the Canadian and Mexican borders.

The constabulary would deal not only with run running, but also with immigration smuggling, and the ordinary run of merchandise smuggling operations now under the eyes of the customs service.

Russian Miners Killed

Moscow.—Twenty-seven miners were killed when a crowded cage fell in a shaft near Gorlovka, in the Donetsk coal basin.

BRITAIN HAS NEW SCHEME TO HELP SETTLERS

Ottawa.—A new assisted passage scheme to provide Canadian farmers with British workers has been announced by the Department of Immigration. Young men in the British Isles who have not been able to find the present £10 steership fare, are to be recruited and after examination by Canadian immigration authorities will be lent their passage money by the British government. The movement will start within a month, it is expected, and several thousand men will probably be brought out this year.

The proposal announced will embrace a limited number of unemployed miners, physically fit, but not necessarily of the skilled farmer class, who come under the present assisted passage scheme.

A survey of the various provinces is at present being conducted by the department and the number of men to be assisted will depend upon the demand for agricultural workers.

The new scheme is explained to be quite different from the milk-canadeaster scheme of last year. The men must demonstrate a desire to settle permanently in this country, and no provision is made to provide return fares at the end of the harvest. None of the expense is to be borne by the Canadian Government.

While applicants need not have farm experience, they will be carefully chosen with regard to physical fitness and willingness to accommodate themselves to conditions.

The new program is to be supplementary to the various assisted passage schemes already in effect. The most important of these is the £2 steership rate for agricultural families, with free passage for children.

Estimates For British Air Force Criticized

Kellogg Pact Has Not Changed Policy, Says Labor Member

London, England.—Joseph M. Kenworthy, Laborite member of the House of Commons, bitterly criticized the British Government in debate upon the 1929 estimates for the air force. He said the government's estimates bore no trace of any change in policy since Britain signed the Kellogg anti-war treaty.

Kenworthy criticized the "enormous cost" of the air station at Singapore and also the utilization there of young airman and "expensively trained cadets."

"I could have understood it two or three years ago, before the signature of Great Britain was affixed to the Kellogg anti-war pact," he said. "A total of \$2,500,000, a fifth of which is to be spent this year, he said, is to be devoted to the Singapore station."

"If the station is merely for defence of a new deckyard, that is an extraordinarily large sum," he said. Sir Samuel Hoare, secretary for air, replied that the expense is part of the general expenditure at the Singapore base, and that Singapore would be capable of handling the aerial side of any operations of the naval base.

"Even if there were no naval base at Singapore, the air base would be necessary," Sir Samuel said, "as it is the cardinal point of our communications."

Wins McKee Trophy

Award For Meritorious Service Given To Western Air Ace

Ottawa.—Captain C. H. "Punch" Dickens, commercial pilot of Edmonton, Alta., has received the McKee trophy award for meritorious service in the advancement of aviation in Canada. During the twelve months he spent a total of 1,035 hours in the air, a remarkable achievement when consideration is taken of the fact that Dickens performed most of his duty in the northern sections of the Dominion.

Announcement of the award was made by Colonel J. L. Ralston, minister of national defence.

To meet increased trade and
passenger traffic on the waters of
the Pacific coast, two new ves-
sels of the "Princess" type for night
service between Vancouver and
Victoria have been ordered by the
Canadian Pacific Railway. It has
been announced by Captain C. D.
Nerouso, manager of the British
Columbia Coast Steamship Ser-
vices.

A new carrier and telephone sys-
tem for Canadian Pacific purposes
will shortly be in operation across
Canada, it was stated recently in
Winnipeg by Mr. John McMillan,
general manager of the Canadian
Pacific Railway Telegraphs, who
was on a tour of the west. This
greatly supplements the facilities
already used.

Since the world war the Cana-
dian Pacific has constructed 1,146
miles of new railway track, most
of which opened up new territories
and developed new areas of country
for settlement and industrial ac-
tivity.

An average of twenty-seven
pounds of butter is consumed each
year by every man, woman, and
child in Canada. It has been dis-
covered by federal statisticians,
making the Dominion the largest
consumer of butter in the world.
The per capita consumption is ten
pounds greater than that of the
United States. No light is thrown
upon the number of slices of bread
battered by hungry Canadians.

The sweetest news received in
Canada for some time was the
report from the British Industries
Fair in London that twenty min-
utes after its opening an order
had been placed for \$50,000 worth
of honey.

Santa Claus must be establish-
ing a stable somewhere in this
country as it is reported that a
consignment of 300 live Swedish
Reindeer was recently shipped to
Canada. It was the largest ship-
ment of these animals ever to be
made.

The recent announcement that a
new Dominion Atlantic Railway
hotel is to be built at Kentville has
been received with enthusiasm, not
only among commercial men but
the general travelling public as
well in Nova Scotia. At the same
time the Dominion Atlantic Rail-
way is the object of a good deal
of favorable comment in the part
it is playing in developing Nova
Scotia as a tourist ground and the
Annapolis Valley.

A taxidermist must be a skilled
sculptor and a student of an-
atomy, said Mr. G. L. Pan, well
known western taxidermist and
sportsman who visited Montreal
recently.

To give a true and life-like
appearance to specimens a full-
sized clay model is first con-
structed. From this a plaster cast
is made and a paper-mache
model formed in turn from this.
The final shell over which the skin
of the animal is carefully glued
shows every feature and conforma-
tion of the animal's body.

It Has Been Done

The band in a small town had just finished a vigorous but not over-harmonious selection. As they sat panting in their seats, trying to catch their second wind, the saxophonist leaned over and whispered hoarsely:

"What's the next one?"

"The Maiden's Prayer," answered the leader, consulting his program.

"Omigod!" yelled the saxophonist, "that's what I just been a- playin'!"

Don't Miss This.

No resident of this town should miss the motor picture presentation of the new Pontiac Big Six to be held Thursday, March 21, according to E. H. Pidgeon, under whose auspices and through whose courtesy the moving pictures are being shown here.

A special representative of the Pontiac factories at Oshawa will direct the presentation, which will include three moving pictures—1 dealing with activity at the huge factories at Oshawa, largest in the Dominion.

Another deals particularly with the new Pontiac, now a Big Six.

In the Same Plight

Sir Herbert Ames, the well-known financier, reports that there are five countries signatories to the League of Nations who have not paid their annual subscriptions. Shame on 'em! But we must not go too far in condemnation: we have several subscribers who are in arrears, and they might think we were hinting at 'em, although nothing could be farther from our thoughts. We mention the matter merely on account of the coincidence—it is rather strange that Peru, Nicaragua, Honduras, Bolivia and China should be in exactly the same position as some of our subscribers. —Blairmore Enterprise.

MENUS

The New Pontiac "Big Six"

Power, performance and luxury previously obtainable only in the big car field distinguish the new Pontiac Big Six, latest product of General Motors of Canada, just put on display in the showrooms of E. H. Pidgeon.

An inspection of this new car reveals that to the many features of sound basic design, which in 5 years have brought the Pontiac swiftly to leadership among the sixes, the designers have added an impressive array of big-car specifications which graduate this car above the small car field in every thing but price.

In view of the interest aroused by the Big Six at the National motor shows in Toronto and Montreal, its appearance here has been eagerly anticipated, and the local dealer is featuring the first showing as an event of more than ordinary interest.

The engine, according to Mr

Pidgeon, is more powerful than a year ago, with 200" of cylinder displacement and developing 57 horsepower.

Paralleling the performance of the power plant are beautiful new longer and wider Fisher bodies. Overall length has been increased to 167 inches.

The Fisher closed bodies all have adjustable driver's seats, smart new sun visors of all metal construction, tilting beam headlights operated by foot control, ebony finish instrument panel, slender ebony-grain steering wheel and de-luxurious upholstery.

Safety is assured by the new dirt and water proof four-wheel brakes, of the internal expanding type, with a useful parking brake on the main driveshaft.

Seven new models comprise the line, a 4-door sedan, 2-door sedan, sport roadster with folding rumble seat, sport phaeton, coupe, and two new types—a landaulet sedan with a folding top, and a convertible cabriolet with rumble seat.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been recommended for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions. Any druggist.

CHAPTER XVII.—Continued

From up the mountainside came a drumming, roar and the rending crash of trees as the fire undermined their roots. Sparks from burning tree-tops crossed the fire-break and started other fires. To combat these, water had to be carried up the steep hillside in pails. Andy was among those delegated to this arduous task. For hours he staggered from stream to hill and back again with a brimming pail in either hand. Scorching by sun and fire, the perspiration streaming down his face and stinging his eyes, the little hero stuck gamely to his task.

"I 'red on this 'ere job as a cook," he grumbled, "not as a blinkin' water-spout. Strike me pink, if the water I've carried today was sprinkled in 'ell the devil'd be out of a job. Oh, well," he added resignedly as he filled his pails and turned to again ascend the hill, "as Methusalem said, 'Every little bit 'elp.' These two buckets weigh exactly four million, two hundred and six gallons that I've carried this day." At this instant his foot caught in a root to send him sprawling on his face rolling down the mossy hillside, the pails clattering after. He lay where he had fallen, flat on his back, with arms outstretched. "There," he soliloquized, "that was the wisest of straw that broke the elephant's back. To 'ell with the fire. Let the blighter burn."

Wilkinson came wearily down the hill. His face was blackened and his hat gone, and his shirt a network from holes burned through the cloth by flying sparks. He 'sprawled on all fours by the stream, drank sparingly, then plunged his face in the cooling waters.

"Elio, Wilkie," shouted Andy, "ow would you like to 'ave a cold bottle of beer?"

Wilkinson seized a stone threateningly and glared at his tormentor. "Men have been killed for less," he growled huskily.

"I 'vy, Wilkie," grinned Andy, "these Forestry jobs are a snap. Do

you 'ave the nerve to collect a salary?"

The district ranger 'was too tired for speech. His swollen face puckered in a smile and he passed on up the hill, and Andy came stiffly to his feet and resumed his never-ending task.

Connie brought reports that the fire was being held on the north and east. The fire-break on the south held, but spot fires were kept in check only by the almost superhuman efforts of the fire-fighters.

Forest fires reach the peak of their intensity while the sun is hottest. With darkness the wind subsides, and, especially in the mountains the heavy dews are a never-failing help.

The sun, showing blood-red through the smoke, now sank behind the hills and a blessed coolness filled the air. The fire smouldered along the fire-breaks, but the dreaded sparks were not flying. The trembling roar diminished to a steady crackling where fallen trees were being steadily consumed.

The fire-fighters, their shoulders drooping, and wavering from sheer weakness, plodded down the hill for well-earned food and rest.

"You'll have to be at it again at daylight," said Wilkinson grimly. They nodded a tired assent. Wilkinson and Donald, with twelve men, patrolled the fire area throughout the night.

The next morning 'broke suddenly in a dull haze. As the first streaks of light heralded the coming of the new day, the fire-fighters again took up their posts. Men from the other mill arrived, and another day of battle with the fire demon was begun. An attempt was made to check it on the west front, high up the mountainside, where the fire had crept through in the night to a small level plateau. At ten o'clock the wind came suddenly, and with it the fire broke through on the south-west corner with a deafening roar and rushed through a stand of dead trees with ever-increasing speed.

Donald shouted a quick cry of warning to the men who were in danger of being cut off by this break. They came on the double quick shot in time, as a lurid wall of flame shot up the hill over the path they had traversed.

"Are the men all out?" questioned Donald.

"Andy isn't here!" said one of the men excitedly.

Donald seized the speaker's arm. "Was Andy with you?"

The man nodded.

Donald's face set in grim lines. Whirling quickly, he ran straight toward the line of fire. With a bound Connie was on her horse and after him at swift trot. As he neared the cordon of smoke, Pegasus changed his gait to that of a mad runaway, and with the small rider lying prone on his bare back disappeared from view.

At this spot the fire had spent its fury in the first mad rush, but a heavy column welled up from the charred ground. Pore possessed the horse, but the calm voice of his mistress urged him on. Crimson embers showered about her. Scorching heat fanned her face, so if the doors of a blast furnace had been opened. A blazing branch fell with a rushing sound, barely missing the horse's head. Sharp reports from the tree-tops made the plucky cayuse shy in a panic of fear.

Filled with apprehension, the crowd of fire-fighters stared with tense anxiety into the drifting smoke. Then a glad cheer burst from them as horse and rider emerged.

Andy clinging to Connie's stirrup and Donald awaying drunkenly in the rear. Ready hands held water to Andy's parched lips and bathed his hot face as he lay panting on the ground. He sat up with an effort and looked about him. "Where's Connie?" he asked. But Connie had stolen quietly from the scene.

By mid-afternoon the main body of the fire was apparently under control, but the persistent spot-fires kept the entire crew engaged. A huge cottonwood, standing just within the fire-breaks, was the chief offender. Sparks from its lofty blazing top were floated by the breeze to land on the dry ground, starting innumerable fires.

"That tree will have to come down or we will be fighting spot fires indefinitely," said Wilkinson.

Silence fell. Everyone of those lumber-jacks knew the danger attached to the falling of a rotten, blazing tree. In sound timber the skilled "faller" can cut the scarf and drive the falling-wedge to lay the tree within six inches of the desired spot. With a hollow tree the task is much more difficult, as in the soft, decayed pulp the wedge must provide sufficient leverage to swing the enormous weight, and the tree may crash from any angle.

Men working at the butt of a burning tree, too, are exposed to the fall of branches. Even a small bough, hurtling from the dizzy height of lordly cottonwood or fir, will break a man's limbs.

Wilkinson picked up a falling saw. "Who will go with me?" he called.

Gill stepped forward with wedge and hammer.

"Nothin' doin'," said little Blackie; "Wilkinson here has a wife and kid, an' Jack has brains enough to be our boss. Me and Hoop-la ain't got neither, we're just a couple rough-necks. Whadda you say, Hoop-la?"

"Ye betcha," came vigorously from Blackie's pal.

Two men were sent with them to assist in clearing a space at the foot of the big snag. A few minutes later the twang of the cross-cut, mingled with Blackie's happy song, sounded above the crackling of the fire.

Wilkinson pointed to the southern sky, where heavy nimbus clouds were massing. "At last! The blessed rain is coming!" he cried in a voice of thankfulness.

A stronger gale swept through the valley to send a surge of flame from the giant cottonwood's topmost branches. There was a sharp cry of warning as a limb broke off with a splinter-crash and came roaring to the ground, sending up a swirl of dust. A strangled cry of pain, animal-like in its intensity, cut the air.

—take it!
It's Safe

The nurse tells you to take Aspirin because she knows that it is safe. Doctors have told her so. It has no effect on the heart, so take it to stop a headache or check a cold. For almost instant relief of neuralgia, neuritis, rheumatism; even lumbago. But be sure it's Bayer—the genuine Aspirin. At druggists, with proven directions for its many uses.

Aspirin is a Trademark Registered in Canada

ASPIRIN

"Blackie's hit," screamed Hoop-la. Blackie lay on his face, his clothing ashen, planned down by the shattered limb. With a heave of powerful shoulders Hoop-la flung the crushing weight aside, and his big hands quickly smothered the fire in the clothing of his fallen comrade. Gently he raised the stricken man in his arms and bore him beyond the range of fire.

"Blackie! Oh, Blackie! are you all right?" he questioned fearfully as he looked down at the quiet face that

held the grey pallor of death. "Call the doctor and bring a stretcher," sharply ordered Wilkinson.

(To Be Continued.)

Taken Without Question

There are times when we question the pronouncements of the learned, but one of the things we have decided not to prove for ourselves is the recent statement of a prominent naturalist that lions are near-sighted.

Protect their Tender Skins and Silky Hair with Cuticura

Teach your children the Cuticura habit. That they may have clear skin and lovely hair through life. The daily use of Cuticura Soap, assisted by Cuticura Ointment, keeps the skin and scalp clean and healthy.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light lust strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold, will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking

Vegetable Compound for nerves and other troubles and it runs 's' I felt different after the first dose. I have used this last six months that I look twenty-five, although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young."—Miss McKee, 15 Laurier Ave., Toronto, Ontario.

Stony Plain and District.

IT PAYS TO PAY CASH.

At the meeting of Town Council, Thursday last, it was arranged to have the town's Light committee, the Mayor, and a representative of the local Power Co. take a trip to Edmonton, to ascertain the possibilities of having power and light supplied by one of the big companies.

The farmer's best friend is The Family Herald and Weekly Star, Montreal. It costs only a dollar a year.

Motor Car Notes.

Mr G Barth has acquired a New Ford, and Mr George J Bryan has purchased a New Ford coupe.

Two carloads of autos came in Friday last—one for Stony Plain Motors and one loaded with Pontiacs.

Mr E H Baron made a motor trip over the week end to Vermilion.

Hoffman & Zucht are now operating a New Chevy Six truck on their motor express line.

Mr Pidgeon has purchased two lots on Main Street just north of the new amusement hall site.

Another shipment of Chevrolet Six cars arrived this week for Sommerfeld and Mayer.

Walther League Meeting.

The members of the Annual Play are now engaged in intensive practise three times a week. Preparations are being made by the Play Committee for several musical selections between the acts.

A large number of worshippers attended the third English Lutheran services in Stony Plain on Sunday, March 17. The topic for Rev. Osterman's discourse was based on St. Matthew 27, 16-25. The next service will be conducted on Easter Sunday (March 31) at 7.30 p.m.

The Entertainment committee and the Membership committee had a combined meeting on Sunday afternoon to discuss and make arrangements for the Annual Reunion Service and Program which is to take place on Easterday. Further announcements will be made next week.

DANCE!

HOLBORN HALL,
MOND'Y, APRIL 1

\$1 Couple. Extra Lady 25c.
Barth's Orchestra.

Calendar.

MARCH—
21—Pastor's Six Demonstration in Stony Plain.
22—E. Sites' sale.
23—Good Friday.
30—Agricultural Society meeting in Town Hall.
APRIL—
1—U. F. W. A. dance at Holborn Hall.

Funeral of Mr. Geistlinger

The funeral took place last week of Mr. Henry Geistlinger, an oldtime resident of Golden Spike district. Deceased had passed away on March 12th, after a lingering illness. He was in his 65th year.

A service was held at the family residence, and also at the church by Rev Wack, of the Lutheran Church (Missouri Synod).

The remains were followed to the grave by a very large number of friends and acquaintances.

Golden Spike

Henry Giese left last week for Loughheed, where he will operate a garage and implement agency. Mr G W Giese is arranging to take a trip there.

While driving his motor car to Edmonton last week Mr E J Baron met with a peculiar accident on the Baseline. While a large truck was passing his car, a small stone was thrown against Mr Baron's windshield, breaking the glass, and throwing fragments of the glass into his eye. An Edmonton doctor attended to the injury.

Mr MacArthur, of Edmonton Normal, will take a week's course of tuition at Governor School, where Mr Ralph Witherspoon is in charge.

Muir Lake Community

The Muir Lake Community Club held a meeting in the schoolhouse on Friday evening, with Mr Charles Poemerl in the chair.

The principal business before the meeting was the matter of making arrangements for building the new Community hall.

Opinions were expressed by representatives of those who wish the new hall to be erected near the schoolhouse, and those who want it farther west.

It was finally decided to go ahead and build on the site chosen, on the Alec Zeiler farm, on Meridian road, four miles north of the Baseline.

Some 14,000 feet of lumber are being nailed to the site, and Mr A V Carter has undertaken to furnish the tamarac beams.

Holborn Happenings.

Mr John Kewley, the well-known farmer, has been advised by his physician to take a year or two's rest from farm work, following his recent illness, and has his farm posted in the for sale column. The farm comprises 148 acres.

A U. F. W. A. dance is billed to be held at the local hall on Easter Monday, April 1.

Mr Jas Phelan, an oldtime resident of Holborn district, who held a clearance sale on Saturday last, so soon as he is able to make business arrangements, is leaving to reside in Buffalo, N.Y. He will engage in business with his brother.

Spruce Grove M.D.

At the inaugural meeting of Spruce Grove Municipal councillors last week the new Councillor for Div. 4, Mr R C Johnson, took his seat at the board. Reeve E C McLaughlin was re-elected without opposition.

An item of interest to those farmers living on the western edge of the municipality is the fact that a new bridge will be installed opposite the Adam Wolfe farm, and another bridge opposite Carl Goetz's farm on Meridian road will be rebuilt.

The program for improvements to the Baseline road include a fine new high level bridge opposite the McLaughlin farm, and a new bridge over Atim Creek.

Spruce Grove News

The sale is reported this week of a quarter section of land in old I R Block to Mr Wm Fuhr, by Alec Callahoo, at \$23 an acre.

The McLeod Co. received a carload of farm implements on Friday last.

A very enjoyable card party was held last week at the home of Mr and Mrs Frank Wild. Those who attended from here had their troubles coming home on the muddy roads.

A few derailed cars near the Buerlein crossing held up railway traffic for a few hours on Friday last.

Butchers' cattle are reported to be a scarce article at present in this district.

Two local motorists this week received invitations to Magistrate McLeod's court for driving a car on a highway not having attached thereto number plates for the current year.

The big attraction in this district Tuesday was the auction sale on the Dick Secord farm.

Mr H Steffler has rented the farm recently acquired by Wm McLeod.

Notices!

E H Pidgeon has taken over the J. I. Case agency for Stony Plain territory and will shortly have a full line of farming implements on display in Stony Plain.

Mr A E Brunelle has been appointed agent for this district for the Singer sewing machine.

(CONTINUED FROM PAGE 1)

communion of the body of Christ?

1st Corinthians 11, 28-29: For as often as ye eat this bread, and drink this cup, ye do shew the Lord's death till he come. Wherefore whosoever shall eat this bread, and drink this cup of the Lord, unworthily, shall be guilty of the body and blood of the Lord. But let a man examine himself, and so let him eat of that bread, and drink of that cup. For he that eateth and drinketh unworthily, eateth and drinketh damnation to himself, not discerning the Lord's body.

FORD SAFETY.

Safety, comfort, reliability, economy, speed, acceleration, beauty—these are the features that make the new Ford such good value. Of all these is none more important than SAFETY.

The safety of the new Ford comes not only from its efficient brakes, but from many other factors. Among these are ease of steering and control, the Triplex shatterproof glass windshield, and the sturdy, balanced construction of the car.

We can make immediate deliveries on all models.

Stony Plain Motors.
